

# AUTISM MOVEMENT THERAPY

AMT is an empowering sensory integration strategy that connects both the left and right hemispheres of the brain (interhemispheric integration) by combining patterning, visual movement calculation, audile receptive processing, rhythm and sequencing into a “whole brain” cognitive thinking approach that can significantly improve behavioral, emotional, academic, social and speech and language skills.

*Joanne Lara, M.A., founder of Autism Movement Therapy, is core adjunct faculty at National University in Los Angeles in the Department of Special Education. She holds a Mod/Severe Education Specialist K-12 California teaching credential and taught students with autism in the Los Angeles Unified School District for over ten years. Ms. Lara earned her B.A. in Dance from the University of South Florida. Visit [www.autismmovementtherapy.com](http://www.autismmovementtherapy.com) for AMT certification workshop dates across the US and more.*
